

Nomination of Agents for Future *IARC Monographs*

The *IARC Monographs* review chemicals, mixtures, occupations, physical agents, biological agents, and lifestyle factors suspected of causing cancer in humans. IARC encourages you to nominate agents for consideration in future *IARC Monographs*. Please use this form to nominate new agents or previously-evaluated agents. IARC selects agents for review based on (a) evidence of human exposure and (b) evidence or suspicion of carcinogenicity.

Your name

Your principal affiliation

If another party suggested that you submit this nomination, please identify

Agent you wish to nominate for consideration in a future *IARC Monograph*

If previously reviewed in an *IARC Monograph*

Current IARC evaluation (Group 1, 2A, 2B, 3, or 4)

Volume and year

In your opinion, what new information would lead to a change in the evaluation?
(list principal references on next page)

Briefly, what is the public health reason for IARC to undertake this review?

Optional information that will assist the Advisory Group in evaluating the merits of your nomination

Principal uses of the agent and pathways of human exposure

Concise overview of the epidemiologic and experimental results

References to the principal cancer epidemiologic studies (include meta- and pooled analyses)

References to the principal carcinogenicity bioassays in experimental animals

References to the principal mechanistic studies or other relevant data (include review articles)

Please send a separate nomination form and WHO Declaration of Interests (see following pages) for each agent by e-mail (priorities@iarc.fr). Thank you for your interest in the *IARC Monographs*.
