

# *IARC Monographs on the Identification of Carcinogenic Hazards to Humans*

## **Nomination of agents for *IARC Monographs***

### **INFORMATION**

#### ***Nominations***

IARC encourages the general public, the scientific community, national health agencies, and other organizations to nominate agents for review in future *IARC Monographs*. Nominations may include chemicals, mixtures, occupations, physical agents, biological agents, lifestyle factors, and anything else suspected of causing cancer in humans. Agents will be selected for review based on: (a) evidence of human exposure; and (b) evidence or suspicion of carcinogenicity.

To nominate an agent for review, please complete the [online nomination form](#) (one agent per form) and the accompanying WHO Declaration of Interests form.

#### ***Advisory Group***

To assist IARC in selecting agents for review in future *Monographs*, IARC regularly convenes international, interdisciplinary Advisory Groups to review all public nominations and to recommend those it considers to be of high priority. IARC convened similar Advisory Groups in 1984, 1989, 1991, 1993, 1998, 2003, 2008, 2014, 2019, and 2024. The report of the 2024 Advisory Group to Recommend Priorities for the *IARC Monographs* during 2025–2029 is available at <https://monographs.iarc.who.int/news-events/advisory-group-recommendations-on-priorities-for-the-iarc-monographs-during-2025-2029/>.

The most recent Advisory Group on Priorities was convened in March 2024 (*The Lancet Oncology* [article](#); [Report of the Advisory Group](#)), but urgent public health priorities for cancer hazard identification may be considered at any time. To nominate an agent with urgency for evaluation, please complete the [online form](#) (one agent per form) and the accompanying WHO Declaration of Interests form.

Thank you for your interest in the *IARC Monographs*.
