

IARC Monographs on the Identification of Carcinogenic Hazards to Humans

Nomination of agents for *IARC Monographs*

INFORMATION

Nominations

IARC encourages the general public, the scientific community, national health agencies, and other organizations to nominate agents for review in future *IARC Monographs*. Nominations may include chemicals, mixtures, occupations, physical agents, biological agents, lifestyle factors, and anything else suspected of causing cancer in humans. Agents will be selected for review based on: (a) evidence of human exposure; and (b) evidence or suspicion of carcinogenicity.

To nominate an agent for review, please complete the [online nomination form](#) (one agent per form) and a [declaration of interests](#) for yourself.

Advisory Group

To assist IARC in selecting agents for review in future *Monographs*, IARC regularly convenes international, interdisciplinary Advisory Groups to review all public nominations and to recommend those it considers to be of high priority. IARC convened similar Advisory Groups in 1984, 1989, 1991, 1993, 1998, 2003, 2008, 2014, and 2019. The report of the 2019 Advisory Group to Recommend Priorities for the *IARC Monographs* during 2020–2024 is available at https://monographs.iarc.fr/wp-content/uploads/2019/10/IARCMonographs-AGReport-Priorities_2020-2024.pdf.

The next Advisory Group will convene in 2024. In response to new scientific information or an urgent public health need, IARC may schedule nominated agents for review at any time.

Thank you for your interest in the *IARC Monographs*.
