

IARC Monographs on the Evaluation of Carcinogenic Risks to Humans
Volume 123: Some Nitrobenzenes and Other Industrial Chemicals
Lyon, France: 9–16 October 2018

List of participants

IARC requests that you do not contact or lobby meeting participants, send them written materials, or offer favours that could appear to be linked to their participation. (You may send pertinent written materials to IARC.) IARC will ask participants to report all such contacts and will publicly reveal any attempt to influence the meeting. Thank you for your cooperation.

Working Group Members and Invited Specialists serve in their individual capacities as scientists and not as representatives of their government or any organization with which they are affiliated. Affiliations are provided for identification purposes only.

Members

Russell C. Cattley, Auburn University, USA
John W. Cherrie, Heriot Watt University, United Kingdom¹
David C. Dorman, North Carolina State University, USA
June K. Dunnick, National Institute of Environmental Health Sciences, USA
Julia M. Gohlke, Virginia-Maryland College of Veterinary Medicine, USA
Jennifer Jinot, US Environmental Protection Agency, USA [retired]
Heiko Udo Kafferlein, Institute of the Ruhr University Bochum, Germany
Leonid Kopylev, US Environmental Protection Agency, USA
Michiharu Matsumoto, Japan Organization of Occupational health and Safety, Japan
Tetsuo Nomiya, Shinshu University, Japan
Kumiko Ogawa, National Institute of Health Sciences, Japan
Luigi Perbellini, University of Verona, Italy
Gabriele Sabbioni, Alpine Institute of Chemistry and Toxicology, Switzerland [withdrew]
Hideko Sone, National Institute for Environmental Studies, Japan
Martin van den Berg, Institute for Risk assessment Sciences (IRAS), The Netherlands

Invited Specialists

None

Representatives of national and international health agencies

Marcia Sarpa de Campos Mello, National Cancer Institute of Brazil, Ministry of Health, Brazil

¹ John Cherrie undertook some consultancy for the Italian oil company ENI in 2015/2016 regarding asbestos exposure in an oil refinery. ENI is the owner of Enichem-Fibre, a company that used N,N-dimethylacetamide to dissolve polymerised acrylonitrile to produce synthetic fibres.

IARC Monographs on the Evaluation of Carcinogenic Risks to Humans
Volume 123: Some Nitrobenzenes and Other Industrial Chemicals
Lyon, France: 9–16 October 2018

Observers

John O'Connor, E.I. du Pont de Nemours and Company, USA²

IARC Secretariat

Lamia Benbrahim-Tallaa, *IARC Monographs Group*
Véronique Bouvard, *IARC Monographs Group*
Fatiha El Ghissassi, *IARC Monographs Group*
Yann Grosse, *IARC Monographs Group* (Responsible Officer)
Kathryn Guyton, *IARC Monographs Group*
Amy Hall, *IARC Monographs Group*
Heidi Mattock, *IARC Monographs Group* (Editor)
Adèle Paul, *Section of Cancer Surveillance*
Mary Schubauer-Berigan, *IARC Monographs Group*
Kurt Straif, *Section of IARC Monographs* (Head, Section of Evidence Synthesis and Classification)

Note regarding conflicts of interests: Each participant first received a preliminary invitation with the request to complete and sign the IARC/WHO Declaration of Interests, which covers employment and consulting activities, individual and institutional research support, and other financial interests. Official invitations were extended after careful assessment of any declared interests that might constitute a real or perceived conflict of interest. Pertinent and significant conflicts are disclosed here. Information about other potential conflicts that are not disclosed may be sent to the Head of the Monographs Programme at imo@iarc.fr.

Participants identified as Invited Specialists will not serve as meeting chair or subgroup chair, draft text that pertains to the description or interpretation of cancer data, or participate in the evaluations. The Declarations will be updated and reviewed again at the opening of the meeting.

Posted on 6 November 2018

² John O'Connor, is currently employed by E.I. du Pont de Nemours and Company, USA, a chemical company that uses N,N-Dimethylacetamide.
